Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 September 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. As best understood by the Examiner, Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker et al. (U.S. 6,325,716).

Walker et al. discloses a conditional lottery ticket system to process conditional lottery ticket transactions, including the acceptance and validation of play entries. The conditional lottery ticket system preferably includes a central lottery server and one or more remote lottery terminals. The conditional lottery ticket system permits a player to purchase conditional lottery tickets that are not activated until one or more player-defined activation conditions are satisfied. The player-defined activation conditions may include a minimum lottery jackpot, a particular future date of activation, or the occurrence of a particular external event. Conditional lottery tickets may be purchased (i) individually and activated the next time the player-specified activation conditions are satisfied; (ii) on a subscription basis for a predefined number of times when the player-specified activation conditions are satisfied; or (iii) on a perpetual subscription basis, until the subscription is cancelled. The conditional lottery ticket system permits the player to specify the numbers to be played for each game, as well as any activation conditions. After the selected lottery numbers and any activation conditions have been stored, the lottery terminal preferably prints and issues the official lottery ticket, indicating the lottery numbers to be played,

as well as any specified activation conditions. The conditional lottery ticket system preferably evaluates pending conditional lottery tickets to determine if the player-defined activation conditions of any conditional lottery tickets are satisfied on a periodic basis, or at some predefined time period before each lottery drawing (Abstract and summary of the invention).

Walker et al. appears to lack explicitly disclosing the elementary draws are dispersed over the surface of the earth. However, Walker's system is directed to a lottery system connected to a network. Furthermore, Walker's system can be configured by a user to play in multiple lottery games that may be connected to the network. Thus, it would have been obvious at the time of Applicant's invention to permit players in Walker's lottery system to play in lottery games all around the world. One would be motivated to do so because this allows the players more opportunities to win a prize and increases the lottery system operators profits by increasing the number of wagers made on the lottery system.

Conclusion
